Summary

Driven, communicative, self-starter with over 18 years of experience looking to help companies fill a gap in their development teams. Eager to learn what makes a software development team tick in a fast paced world.

Projects

Choose Your Destiny

- This project was more back end focused, which was very different to previous projects.
- My understanding and handle of Active Record really blossomed in this project.
- The resulting project was visually simple, but with a lot of information with room to grow.

Git Gud

- React front end app, experimented with the more dynamic aspects of React.
- First time using Semantic UI, making an app that is more pleasing to look at.
- We made a fun and light app that not only was informative but entertaining as well.

Cat or Dog Quiz

- This was first project outside of labs, creating the structure labs give was a great experience
- Got a better understanding of CSS and how things should look
- It was a rather simple but well made app, not only am I proud of it but I learned a lot.
